Premium Plugins

Power Paste

The *Power Paste* plugin has generally no UI apart from a confirmation dialog. The confirmation dialog has the same (minor) accessibility issues as other dialogs.

Advanced Code Editor

The *Advanced Code Editor* is **not accessible** to users using assistive technologies like screen readers.

Export to PDF

The *Export to PDF* plugin's functionality to create a PDF is **accessible**; however, the resulting PDF is **not accessible**.

Spell Checker Pro

Using *Spell Checker Pro* is **generally accessible**, save for an issue where the focus is lost when selecting another language to check spelling against.

Page Embed

The *Page Embed* plugin is **accessible**; however, the plugin does not require a title for the created iframe.

Enhanced Media Embed

Embedding media is also **accessible** with a similar caveat as the *Page Embed* plugin regarding iframe titles.

Accessibility Checker

The *Accessibility Checker* has several accessibility issues, including that the messages do not clearly say to what part of the document a specific warning or error belongs and unclear links and buttons.

Advanced Tables

The functionality of *Advanced Tables* is accessible. The menu item to sort a column is available even when the column is not sortable.

Comments

The *Comments* plugin is **not accessible** and exhibits several accessibility issues, which include relying on placeholder attributes for labeling form fields, indicating comments with a low-contrast background color change, unintuitive keyboard navigation, and informational messages that are not announced.
